Two day course for Science Teachers and Laboratory Technicians by Dr Phillip Crisp, Australia's leading trainer and author on Chemical Safety and Risk Management in Schools.

The following key areas will be covered: chemical risk assessment, dangerous chemicals and equipment, disposal of chemical waste, safe storage of chemicals, group discussions, and workshop on *RiskAssess* software.

On completion of this session participants will:

- Understand modern risk assessment and management practices
- Understand how to use *RiskAssess* software in their weekly practice
- Have learned from others mistakes
- Understand acceptable practice in Australian Schools
- Understand current storage and disposal needs for chemicals
- Have a greater appreciation for dangerous chemicals and safe use of equipment
